

SolarMax Energy Systems

**\$100 USD cost-effective
outdoor power supply**

Overview

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How much does a portable power station cost?

Outputs Portable power stations can get expensive, but this model from Bluetti is a fantastic budget-friendly option, currently retailing for \$330. Despite its lower price, it's a powerful unit capable of delivering 1,000W output for regular loads and up to 2,000W for resistive loads like heaters or hair dryers.

What are the best portable power stations?

To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, Oupes, EcoFlow, Anker, Goal Zero, Greccell, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Oupes. ↓ [Jump to the Rest of the Field](#) ↓ [What to Know Before Purchasing a Portable Power Station](#).

Should you buy a power brick or a portable power station?

Small power bricks have enough juice to charge your phone a few times, while a cooler-sized portable power station can keep vital electronics running during a power outage or camping trip, and the most powerful options will provide electricity to your entire house.

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can

get out of it is a different story.

How much power do you need for camping?

The answer to this depends largely on what you intended to do with it. If all you want is backup power for your family's phones while camping over the weekend, you can get away with something relatively small — 200 watt hours would be more than enough.
