

SolarMax Energy Systems

100MW advanced hybrid energy storage project

Overview

What is a 100MW hybrid gravity energy storage system?

The collaboration is to develop a 100MW Hybrid Gravity Energy Storage System, a solution designed by Energy Vault for underground mines, pairing their modular gravity storage and batteries. According to a press release by Energy Vault, the energy storage solution will be deployed 1640 feet (500 meters) deep mine shafts.

Will Energy Vault & carbosulcis build a 100MW hybrid gravity energy storage project?

Energy Vault and Carbosulcis announce 100MW hybrid gravity energy storage project. Two firms, Energy Vault, and Carbosulcis, have announced a collaboration to build a 100-megawatt hybrid gravity energy storage project to accelerate the carbon-free technology hub at Italy's largest former coal mining site in Sardinia.

What is hybrid energy storage?

The Hybrid Energy Storage solution is designed to optimize and fully capitalize on the specific topology of the site and the 500-meter-deep mine shafts, highlighting the unique proposition of Energy Vault as a fully integrated and diversified provider of tailor-made energy storage solutions.

How will a hybrid energy storage system help Sardinia?

Moreover, the Hybrid Energy Storage System will help to stabilize the island's power grid, with plans to dispatch renewable energy to help meet the high demand during peak load hours while encouraging further local use of renewable generation in Sardinia.

Who owns the 100MW energy storage system in Sardinia?

The 100MW energy storage system will be owned and operated by Energy Vault, and is key to increasing the local use of renewable energy in Sardinia

while accelerating the formation of the Renewable Energy Technology Hub.

What is Energy Vault's new energy storage system?

The proposed system combines long-established pumped hydro energy storage technology with Energy Vault's innovative gravity energy storage technology, allowing the partners to repurpose the unique underground features of the site as a retired coal mine.
