

## SolarMax Energy Systems

# 12Ah lithium battery pack production

## Overview

---

Can Lithium Werks make a custom battery pack?

Lithium Werks' patented Nanophosphate® battery technology (designed by MIT and A123) can be used in your custom modules. We can design and manufacture custom battery packs using lithium iron phosphate (LFP) cells for your power or energy application. Robust cylindrical, prismatic, or pouch cells can be produced for your pack.

What makes a custom lithium-ion battery pack unique?

The foundation of any custom lithium-ion battery pack lies in the selection of the integrated cells. Our cell selection for custom packs involves: Lithium-ion cell advancements continue expanding performance boundaries yearly. Leveraging state-of-the-art cell technology is crucial for maximizing custom pack capabilities.

What is a lithium ion battery pack?

A battery pack consists of multiple cells connected in series or parallel. How to make lithium-ion batteries?

It's always been an interesting topic. The production of lithium-ion batteries is a complex process, totaling Three steps. The cell sorting stage is a critical step in ensuring the consistent performance of lithium-ion batteries.

What is advanced lithium battery pack design?

Advanced Lithium Battery Pack Design: These custom batteries are made when the customer has special requests for temperature capabilities, dimensions, discharge current, and/or battery cycles. In this case, our chemistries, enclosure, and battery management system (BMS) experts are required to monitor each project closely.

What is a lithium ion battery?

Lithium Werks builds custom battery packs and modules using lithium iron phosphate LFP batteries. Lithium ion provides power, safety, and life to your application.

How do you make custom lithium-ion battery packs?

**Key Takeaway:** Manufacturing custom lithium-ion battery packs requires precise engineering, quality control, and safety standards. The process involves gathering requirements, selecting cells, concurrent engineering, prototyping, certification, production planning, and lifecycle support.
