

SolarMax Energy Systems

12kw solar system

Overview

How much does a 12kW Solar System produce?

Some efficiency losses might derive from weather conditions or some shading over your panels. A 12 kW system produces an estimated 900 to 2000 kilowatt hours per month, assuming at least 5 sun hours per day with the panels facing south.

How much does a 12Kw solar panel system cost?

The average cost to install solar panels is from \$10,626 to \$26,460 (after tax credit) for a 6kW to 12kW system to power an entire house. The average solar panel payback period is 7 to 12 years, and solar energy saves \$600 to \$2,000 per year on electricity costs.

What size Solar System do you actually need?

What size solar PV system do you need?

The size and output of your solar array depends on the size of your home, and your annual electricity usage. The average three-bedroom house will use 2,900 kWh per year, meaning you'll need 10 panels that generate 350 kW each for a kWp of 3.5.
