# 2025 Energy Storage Lithium Battery Demand GWH

✓ TELECOM CABINET

✓ BRAND NEW ORIGINAL

✓ HIGH-EFFICIENCY

## Overview

---

Will lithium-ion battery demand increase in 2025?

In 2020, global sales of EVs reached 1.5 million units, with a corresponding lithium-ion battery demand of 65 GWh. Projections indicate a substantial increase to 137 GWh in 2025 and 245 GWh in 2030, emphasizing the pivotal role of lithium-ion batteries in the automotive industry.

When will lithium ion batteries be used in energy storage?

In 2024, global demand for lithium-ion batteries in energy storage is expected to reach 256.41 GWh, and this will rise to 355.22 GWh in 2025 and 463.23 GWh in 2026. Lithium carbonate inventories began to climb at the end of 2023.

Will the lithium market recover by 2025?

In summary, despite challenges such as oversupply and price pressures, the lithium market is poised for recovery by 2025, driven by supply adjustments, the gradual exit of unprofitable producers, and increasing demand from electric vehicles and energy storage systems.

How big will energy storage be in 2025?

BloombergNEF forecasts a record 94 GW (247 GWh) of utility-scale storage in 2025—a 35% rise—driven by China's storage mandates. US tariffs, policy shifts and LFP dominance will drive growth to 220 GW/972 GWh by 2035. The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions.

What drove EV battery demand in 2023?

Demand was largely driven by growth in EV sales, as demand for EV batteries grew to over 950 GWh – 25% more than in 2023. Electric cars remain the principal factor behind EV battery demand, accounting for over 85%.

Will lithium demand grow 26% in 2025?

Adamas Intelligence, a battery metals and electric vehicle consultancy in Toronto, predicts global lithium demand will grow 26% year-over-year in 2025, reaching 1.46 million tons of LCE, up from an estimated 1.15 million tons in 2024. The largest contributor to lithium demand comes from electric vehicles (EVs).
