2025 Energy Storage Power Station Ranking

BMS Wiring Diagram

Overview

How much battery storage capacity will Texas have in 2025?

Developers in Texas are expecting to bring 7.0 GW of battery storage capacity online in 2025, with much of that capacity coming online in the second half of the year. Developers retired relatively little generating capacity in the first half of 2025.

How many GW of electric generating capacity will be retired in 2025?

Of the 8.7 GW of electric generating capacity that U.S. operators plan to retire during 2025, only 2.0 GW was retired in the first half of the year.

How many GW of solar generating capacity are there in 2025?

Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the second half of the year, according to our latest survey of electric generating capacity changes.
