5G base stations and communications in Qatar

Overview

Does Qatar have a 5G network?

Yes, Qatar has a 5G network. The 5G rollout launched in Qatar in 2018 and continues at a rapid pace. Both Ooredoo and Vodafone have launched commercial 5G networks.

What is the main benefit of 5G technology in Qatar?

The rollout of a 5G network across the country brings with it a host of exciting use cases for digital government and smart city initiatives. Qatar has positioned itself as a pioneer in ICT technology.

When did 5G rollout start in Qatar?

The 5G rollout launched in Qatar in 2018 and continues at a rapid pace. According to the CRA, service providers have a licensing obligation to cover 40% of all densely populated areas, primary roads and 2022 FIFA World Cup venues by 2020. Both Ooredoo and Vodafone have launched commercial 5G networks.

Does Vodafone provide 5G Internet in Qatar?

In addition to offering unlimited 5G services for businesses in Qatar, Vodafone now also offers commercial 5G home internet through its fibre network. In April 2019 it launched GigaHome, a 5G internet multi-play service that uses a high-powered router to ensure Wi-Fi coverage in all areas of the home.

How many mobile customers does Qatar have?

The Company commenced commercial operations in 2009 and has 2.1 million mobile customers as of 31 March 2025. Its state-of-the-art network infrastructure is expanding to cover key locations in the country with fibre connectivity and 5G, along with an extensive digital ecosystem, which will contribute to Qatar's continued growth and prosperity.

How will 5G technology impact the IoT use cases in Qatar?

5G technology can be applied across various IoT use cases in Qatar, from smart city initiatives to e-government platforms and cloud computing. This includes sectors such as transport, retail, energy, health care, and education, which are set to benefit from the increased speeds and connectivity.
