

SolarMax Energy Systems

Adjustable output power grid-connected inverter

Overview

Grid connected inverter is a crucial component in solar power systems that integrate with the electrical grid. For series of 300 watt to 1000 watt rated power inverters, feature with pure sine wave output, no battery design, wide DC input (20V-50V DC) and AC output (90-140V AC / 180-260V AC) range.

Adjustable output power grid-connected inverter

The PWM Strategies of Grid-connected Distributed ...

Meanwhile the main disadvantage of the NPC inverter is given by an unequal distribution of the losses in the semiconductor devices, which leads to an unequal distribution of temperature ...
