

## SolarMax Energy Systems

# Algeria Communication Base Station Wind Power Company

RS485

Communication between battery and inverters  
Baud rate:9600bps

RS485 Interface

Communication between parallel packs or BMS and PC  
Baud rate:9600bps

## Overview

---

Algeria currently generates a relatively small amount of its electricity (e.g., three percent or 686 MW annually), from renewable sources, including solar (448 MW).

The Algerian government seeks foreign suppliers of new technology, technical know-how, and expertise in the following areas: Solar PV 1. Engineering for utility.

The Algerian solar power supply chain grew significantly in the last decade and now seeks to add IPP development, engineering and design capabilities, EPC.

Where is wind energy potential located in Algeria?

Apart from the El Golea region, more interesting wind energy potential is located in the southern part of Algeria. For the coastal zones and the high plains, the sites with wind energy potential up to 100 W/m<sup>2</sup> are located in the western part of the country. 5. Conclusion.

Will Algeria build a one-gigawatt solar energy project in 2021?

Towards this end, Algeria launched a tender for a one-gigawatt solar energy project in 2021, comprised of building five power generation sites ranging from 50 to 300 MW each.

How much wind does Algeria have?

For wind, Algeria has a 1,300-kilometer Mediterranean coastline with wind speeds of more than eight meters per second, in addition to winds coming off the surface of the Sahel in the South. Algeria aims to produce 27 percent of its electricity from renewable resources by 2035, mostly from solar power.

Who are US companies interested in doing business in Algeria?

U.S. companies interested in doing business in Algeria will primarily interact with SHAEMS, a company owned by Sonatrach and Sonelgaz, created to serve as a one-stop shop for companies pursuing larger IPP renewable energy

projects. Upcoming tenders will include Sonelgaz, Sonatrach, AEC, or SHAEMS as the main party to the agreement.

What is the power sector in Algeria?

Revised in May 2021, this map provides a detailed overview of the power sector in Algeria. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, gas and liquid fuels, natural gas, nuclear, hybrid, hydroelectricity, solar (PV) and wind.

How much electricity does Algeria generate a year?

Algeria currently generates a relatively small amount of its electricity (e.g., three percent or 686 MW annually), from renewable sources, including solar (448 MW), hydro (228 MW), and wind (10 MW).

## Algeria Communication Base Station Wind Power Company

---

### Projects & Infrastructure

Electricity and Gas Company (Sonelgaz) Sonelgaz Group is a state-owned company responsible for electricity and gas production, transmission, and distribution in Algeria.
