

SolarMax Energy Systems

American solar system customization company

Overview

Who is American Solar Corporation?

American Solar Corporation is the leading installer of high-quality solar systems for energy-smart homes and businesses in Northern California. On the leading edge of the smart energy revolution and with over 30 years of accumulated expertise in our field, we have completed over 100 Megawatts of solar and related clean energy projects to date.

Why should you choose American Solar?

Smart homeowners, businesses, and non-profits achieve massive energy cost savings with solar panels from American Solar. As the leading clean energy company in Northern California, we specialize in solar systems, energy storage, estate scale battery backup and electric pool heating to fully satisfy your residential or commercial property.

Why should you choose a solar panel that is made in America?

Choosing a solar panel that is made in the United States supports both American manufacturing and American jobs. Because these panels are designed and tested in the U.S., the specifications provided are true to the environment that you will use them in most of the time.

Where can I get solar panels installed?

Getting solar panels installed on your own home is best done through a local or regional company, while these American solar companies can offer that option on a larger scale. Cypress Creek Renewables: This Durham, North Carolina-based energy company provides green energy throughout the U.S. using solar panels at their solar project sites.

Which mission Solar System should I buy?

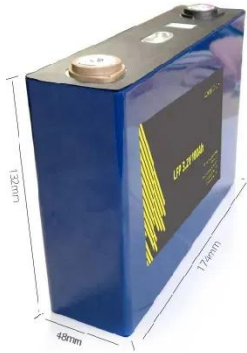

Mission Solar has multiple product offerings, which I like. Their most expensive (and most popular for residential use) is the sleek MSE PERC 60 BLACK. It

looks nice, performs well, and can work with both residential and commercial roofs. The MSE PERC 60 looks more like the original solar panel technology, with visible cells.

Does American Solar Corporation use robo calls?

*****IMPORTANT***** American Solar Corporation is not affiliated with any similarly named entities that use robo calls and, in some cases, illegal telemarketing tactics. We are a family-owned San Francisco Bay Area business, and as such we maintain close connections with our clients and do not employ telemarketers.
