Overview

Who is responsible for Emergency Management in Australia?

State and territory governments are responsible for emergency management within their own jurisdictions, including the resilience of power networks and provision of communications for emergency service organisations. All Australian states and territories have established dedicated radiocommunications systems for use by emergency services.

What is the Emergency Management Operational Communications program?

The Emergency Management Operational Communications Program sets out a plan to transform the sector's operational communications to meet these future demands. Find out more about the Emergency Management Operational Communications Program including the latest program updates. Who are we?

.

How many emergency communications networks are there in Victoria?

Today, there are four state contracts which provide emergency services communications networks covering: These shared networks are in addition to various agency-specific networks. In the future, we envisage a single, joined-up network serving seven agencies across Victoria will be provided. Why is the Operational Communications Program different?

.

Where can I listen to emergency information?

These sources include local radio, television, and state and territory emergency service websites or apps. For example, during emergency situations people can listen to ABC Local Radio to receive up-to-date warnings. You should also consider downloading the Emergency+ app.

Does Australia have a radiocommunications system?

All Australian states and territories have established dedicated radiocommunications systems for use by emergency services. The Australian Government provides support to the states and territories through the Radiocommunications Act 1992, including making sure adequate spectrum is available for agencies providing emergency services.

How do emergency alert devices work in Australia?

These devices are readily available from a number of recognised providers and can operate across the entire Australian landmass. Emergency Alert is the national telephone warning system used by emergency services to send voice messages to landlines and text messages to mobile phones within a defined area regarding likely or actual emergencies.
