

## SolarMax Energy Systems

# Australia s Qihou Energy Storage Power Station

## Overview

---

Will EnergyAustralia install a big battery energy storage system near Mt Piper?

EnergyAustralia's plans to install a 500 MW/2,000 MWh big battery energy storage system adjacent to its Mt Piper coal-fired power station in New South Wales are gathering momentum with the Hong Kong-owned generator and retailer receiving approval to conduct site investigation works.

What is Australia's energy storage capacity?

Australia had 2,325MW of capacity in 2022 and this is expected to rise to 22,076MW by 2030. Listed below are the five largest energy storage projects by capacity in Australia, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a complete picture of the global energy storage segment.

Where is Energy Australia building a battery?

EnergyAustralia has committed to building a four-hour utility-scale battery of 350 MW capacity on the site of its gas-fired Jeeralang power station at Hazelwood North in Victoria's Latrobe Valley. The Wooreen Energy Storage System is scheduled to be commissioned by the end of 2026, ahead of Yallourn's planned closure in mid-2028.

Why is NHOA delivering a battery storage facility at Kwinana Power Station?

Synergy, Western Australia's state-owned electricity generator and retailer, has selected NHOA for the delivery of a 100MW/200MWh battery storage facility to be located at the Kwinana Power Station site, to provide additional security and stability to Western Australian's power system.

What is the Geelong big battery energy storage system?

The Geelong Big Battery Energy Storage System is a 300,000kW lithium-ion battery energy storage project located in Geelong, Victoria, Australia. The rated storage capacity of the project is 450,000kWh. The electro-chemical

battery storage project uses lithium-ion battery storage technology. The project will be commissioned in 2021.

How much energy storage capacity will Australia have in 2022?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Australia had 2,325MW of capacity in 2022 and this is expected to rise to 22,076MW by 2030.
