

SolarMax Energy Systems

Australian Energy Storage Container

Overview

What is a medium energy storage system?

Delivering at less than 80 dB (A), these medium energy storage systems are suitable for noise-sensitive environments, such as events and construction sites in metropolitan areas, as well as for telecom, manufacturing, mining, oil and gas and rental applications.

What is a stand-alone energy storage system?

Stand-alone medium energy storage systems offer no fuel consumption and no CO2 emissions during their operation. This scenario is also common for microgrids with a backup generator, in which the energy storage system is managing the input coming from the grid and/or renewable sources of energy.

What is a 10ft energy storage system?

These energy storage systems come in a 10ft container. Designed to meet the requirements for off- and on-grid applications, they are ideal in combination with renewable stations, providing up to 9,2 MWh of storage capacity —with 16 ZBC 250-575 units connected in parallel.

Who is apex Energy Australia?

At Apex Energy Australia, we offer state-of-the-art Battery Energy Storage Systems (BESS) tailored to meet diverse energy needs.

Why should you choose Redearth for energy storage?

RedEarth is leading the charge in energy storage. With us, you don't just power your home, you invest in your future. Discover how to future-proof your home and turn your excess electricity into an income stream. With RedEarth, you get more. Australian-Made Energy Storage Solutions

Australian Energy Storage Container

Hithium to Supply Grid-scale BESS Project in Australia

First project to be constructed using 5MWh energy storage containers in Australia with 25 years warranty. Partners with INTEC Energy ...

 Efficient
Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 1000V
- 150kW Peak Output Power
- 2 MPPT Trackers, 100% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

 Intelligent
Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 Flexible
Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCD Function (Optional): when an arc fault is detected the inverter immediately stops operation
