

SolarMax Energy Systems

Australian telecommunications signal base station 6 25MWh

Overview

What is the mobile phone base station deployment code?

The Mobile Phone Base Station Deployment Code is designed to: allow the community and councils to have greater participation in the decision-making process of Carriers when deploying mobile phone base stations.

Where can I find information about mobile phone base stations?

Information about proposed and current mobile phone base stations is available on the Radio Frequency National Site Archive (RFNSA) at [You can subscribe to receive information about future installations of Small cells](#) are installed by Telcos to provide improved coverage and capacity in local areas for both 4G and 5G services.

Who approves a mobile phone base station?

There are rules telcos must follow to install mobile phone base stations. The decision on who approves a base station depends on several planning factors, including: the classification/zoning of the land. To find out if a base station requires approval under local government, state or territory planning law, please contact your local council.

What if a mobile phone base station is low-impact?

If a base station is low-impact or no approval is required under the local government, state or territory planning process, telcos consult with you by following the applicable consultation process in the Mobile Phone Base Station Deployment Code. All mobile phone base stations must stay within the safe limits of electromagnetic energy (EME).

Are mobile phone base station antennas harmful?

Based on current research there is no established scientific evidence to support exposure to the low-level RF EME from mobile phone base station antennas causes any health effects. An essential part of Australia's mobile

phone network, base station antennas can be found on towers and buildings around the populated areas of our country.

Are NBN base stations the same as mobile phone towers?

The rules for these facilities are in Schedule 3 of the Telecommunications Act 1997 and the Telecommunications Code of Practice 2021. NBN base stations are not the same as mobile phone towers. The rules on mobile phone towers do not apply to the NBN. NBN base stations use radiofrequency electromagnetic energy (EME).
