

## SolarMax Energy Systems

# Austria energy storage batteries are maintenance-free

## Overview

---

What are the incentives for battery storage in Austria?

Approximately 3,500 residential battery energy storage systems (BESS) in Austria were accelerated by an investment grant launched in 2018 at the federal level to kick-start the technology. There are also regional incentives available for both small-scale solar and battery storage in Austria.

How many photovoltaic battery storage systems are there in Austria?

Of these, approx. 94% were built with public funding and 6% without. The total inventory of photovoltaic battery storage systems in Austria therefore rose to 11,908 storage systems with a cumulative usable storage capacity of approx. 121 MWh.

Does Austria have a market for energy storage technologies?

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for the first time.

How many tank water storage systems are there in Austria?

A total of 840 tank water storage systems in primary and secondary networks with a total storage volume of 191,150 m<sup>3</sup> were surveyed in Austria. The five largest individual tank water storage systems have volumes of 50,000 m<sup>3</sup> (Theiss), 34,500 m<sup>3</sup> (Linz), 30,000 m<sup>3</sup> (Salzburg), 20,000 m<sup>3</sup> (Timelkam) and twice 5,500 m<sup>3</sup> (Vienna).

How big is Austria's hydraulic storage power plant capacity?

In 2020, Austria had a hystorically grown inventory of hydraulic storage power plants with a gross maximum capacity of 8.8 GW and gross electricity generation of 14.7 TWh. This storage capacity has already played a central role in the past in optimising power plant deployment and grid regulation.
