

SolarMax Energy Systems

Austria s largest integrated home solar system

Overview

Who owns a solar plant in Austria?

The plant includes sheep farming. The solar plant was built with 25,600 panels. German project developer Maxsolar has completed an 11.5 MW photovoltaic, ground-mounted system on a former gravel dump in Austria. The owner of the facility is the country's largest power provider Wien Energie, which is itself owned by the City of Vienna.

How much solar power does Austria generate?

Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

How many solar panels does Austria need?

With more than 3,500 MW thermal the country ranks second in the EU, only behind much larger Germany. Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.

Which country has the largest solar power station?

In September, 2011, Austria's largest solar power station, 2 MW, was under construction in the Niedere Tauern mountain range. Austria has also a large capacity of solar heating at its disposal. With more than 3,500 MW thermal the country ranks second in the EU, only behind much larger Germany.

How much money does Wien Energie invest in solar and electric vehicles?

Wien Energie announced in 2018 a plan to invest around €100 million in solar and €15 million in charging stations for electric vehicles. This content is protected by copyright and may not be reused.

Austria's largest integrated home solar system

Austria's largest ground-mounted PV plant

Austria's largest photovoltaic system is currently located in Vienna. The 11.45 megawatt system produces over 12 gigawatt hours of solar power for 4,900 Viennese households every year.
