Base station DC distribution cabinet

Overview

What is dcdu-12b?

DCDU-12B provides stable power distribution for the TDS-LTE Base Station System. It is the DC distribution unit or device. It serves for distributing the DC power needed for different power needed devices like RRU, EMUB, BBU, and many more.

What is DC power systems?

DC Power Systems provides quality, reliable and efficient DC power equipment and products for a range for telcom, data center, and industrial applications.

What is a high-density mini-sized DC power solution?

High-density mini-sized DC power solutions for outside plant enclosure, central office or embedded applications. The NetSure 2100 Series, a compact -48 volt, 48 amp DC power shelf, features an advanced control unit, up to (3) positions for 1000W high-efficiency eSure rectifiers and space for distribution breakers and fuses.

What is a DC power enclosure?

Custom designed or standard enclosures available for all types of telecom and data equipment. This series of enclosures is specifically designed for small cell applications where DC power is required to support your network equipment. The power cabinets not only house the DC power system, but also have 1 RU of room for ancillary network equipment.

What are the ground points on a dcdu-12b?

ground points at the rear of the DCDU-12B are connected to the ground bar in the equipment room. and distributed base stations. The following figure shows the ports and terminals on a DCDU-12B. The following table describes the ports and terminals on a DCDU-12B.

How many ports does a dcdu-12b have?

It consists of two input terminal blocks and 10 different ports for output. Each port or certain port is assigned for its maximum output fuse current. DCDU-12B provides stable power distribution for the TDS-LTE Base Station System.
