

## SolarMax Energy Systems

# Base station outdoor cabinet power consumption

### HEAT DISSIPATION

Cold aisle containment,  
making optimal refrigeration effect;

## Overview

---

Outdoor standardized cabinet schemes for small stations in indoor distributed base stations include: outdoor standardized cabinet (single cabinet), embedded power supply, storage battery, BBU equipment and transmission equipment, and RRU is located outside the antenna. The total power consumption of the system is 400W~1000W, the batteries are configured according to 10-hour backup, and two groups of 100Ah/12V or 150Ah/12V batteries can form a base station with a single cabinet, which covers an area of about 1 m<sup>2</sup>, and the maintenance space is about 2.5 m<sup>2</sup>, saving an area of 90%.
