

SolarMax Energy Systems

Battery cabinets with batteries include photovoltaic

Overview

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

What is a battery enclosure?

This place is called a "battery enclosure", or what is essentially a vented box made from aluminum or fiberglass or steel. This product is perhaps more commonly called a "solar battery box" but is also referred to as a "pole mount battery box".

Do I need a separate battery enclosure?

The enclosure may need to be externally vented depending on the building requirements that house the battery. In most industrial applications, if the batteries are installed in a dedicated space, a separate enclosure is not required.

Are battery enclosures available in powder coat?

And, as always, thank you for visiting MrSolar.com, We Know Solar Energy! Battery enclosure available in Powder Coat, please call 888.680.2427 for pricing and availability. Battery enclosures and cabinets are a safe way to store batteries and to protect them from the elements as well as providing a line of defense against theft.

Why do you need a battery enclosure box?

Battery enclosures keep your batteries safe from weather and safe from theft. Battery enclosure boxes also feature locking mechanisms that protect unauthorized people against possible electrical dangers if they happen to be

tampering with your equipment.

Should VRLA batteries be vented?

In general, all battery enclosures should be vented. This includes VRLA batteries, as hydrogen gas could potentially build up in a fault condition (e.g. controller failure). Passive venting should be adequate and active venting, like a fan, should only be required in rare cases.
