

## SolarMax Energy Systems

# Battery inverter 48V 60V universal

## Overview

---

What is a 48 volt inverter charger?

This inverter charger is perfect for your off grid system or for use as an emergency backup supply. Built with a 48 volt DC input, this inverter performs with very little power loss. Users receive a notable increase in efficiency in large systems when compared to using inverters that accept 12 or 24 volts.

How to use inverter 240V?

Generator mode -- use unstable generator 240V to generate power, access the inverter AC input, through the inverter AVR regulator, automatic matching 60HZ municipal frequency, output voltage regulator in the normal operating range. 5. Unattended Mode ---When the battery is low voltage, the inverter goes into standby state (Power saving state).

Can a power inverter charge a battery bank?

This Power inverter is able to charge the battery bank when AC power/Solar power is connected to the inverter. This inverter can ONLY work with 48V battery system. Inverter CAN NOT support connect in parallel. Inverter MUST have a battery, and the battery MUST be connected first.

Which solar inverter is best for off-grid living?

Efficient Energy Conversion : The 8000W inverter transforms DC electricity from your battery bank or solar panels into AC power effectively. This makes it an excellent choice for off-grid living. Where sustainable energy produced using solar panels. Connect your solar energy system to our efficient pure sine wave inverter to maximize its potential.

What is a pure sine wave solar inverter?

Your purchasing power is . This Pure Sine Wave Solar Inverter is a combination of an inverter, ac battery charger , MPPT solar charge controller and AC auto-transfer switch.

Does a 12V inverter automatically disconnect a power supply?

An inverter with a 12v input, if voltage is lower than 10.5v or higher than 15v. will automatically disconnect the power supply for protection. An inverter with a 24v input, if voltage is lower than 20v or higher than 30v. will automatically disconnect the power supply for protection.
