

SolarMax Energy Systems

Battery semiconductor solar photovoltaic power generation energy storage cabinet

Overview

What is a commercial solar battery storage system?

The commercial solar battery storage system is loaded with cell modules, PCS, photovoltaic controller (MPPT) (optional), EMS management system, fire protection system, temperature control system and monitoring system. The system configuration is modular, support multi-machine parallel, plug and play, easy to install and maintenance.

What is a rack-mounted modular PCs?

Configured with a rack-mounted modular PCS, it supports parallel connection of multiple machines and has good scalability; the number of PCS modules and the total battery power can be selected according to the solar energy thermal storage system capacity requirements of microgrid and other scenarios.

What is a p500e energy storage system?

The P500E has a modular design with a built-in STS and transformer. With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.

Battery semiconductor solar photovoltaic power generation energy

Solar Battery Storage Cabinet

The LZY solar battery storage cabinet is a tailor-made energy storage device for storing electricity generated through solar systems. They assure perfect energy management to continue power ...
