

## SolarMax Energy Systems

# Bolivia Base Station Energy Management System

## Overview

---

What are the resources available for the Bolivian energy system?

The resources available for the Bolivian energy system could be divided into fossil and renewable. Bolivia holds FG reserves (2 729, 1 009, and 1 485 TWh of proven, probable and possible reserves in 2018) . Furthermore, the economy of the country relies to a great extent on fiscal revenues and tax collection from FG exports.

What are Bolivia's energy goals and projections?

Nevertheless, most of Bolivia's energy objectives and projections are based on 2007 statistics and extend un-til 2030. Recent expansion plans for the sector are described in the Patriotic Agenda for 2025 and the update of the Intended Nationally Determined Contribution (INDC) .

What is Bolivia's energy supply in 2021?

According to the information provided by the Ministry of Hydrocarbons and Energy (MHE), Bolivia's total pri-mary energy supply (TPES) in 2021 was 202.9 TWh, based mostly on fossil fuels (80.7% and 11.9% of the energy coming from fossil gas (FG) and oil, respectively). From this value, 58% corresponded to gas export (117.4 TWh) .

Is the Bolivian energy system still fossil-based?

Comparison of scenarios In 2035, according to the BAU scenario results, the Bolivian energy system is still fossil-based, with traditional fuels accounting for 62% of the TPES.

Can agricultural residues be used as a low-cost energy source in Bolivia?

Even though agricultural and forest residues are abundant in Bolivia, they are not utilized as a low-cost energy source to increase the proportion of renewable energy in the energy mix and reduce fossil fuel consumption.

Does Bolivia have a low-carbon power system?

Balderrama JGP, Alfstad T, Taliotis C, Hesamzadeh MR, Howells M. A sketch of Bolivia's potential low-carbon power system configurations. The case of applying carbon taxation and lowering financing costs.
