

SolarMax Energy Systems

Bolivian communication base station power

CE UN38.3 

Overview

In Bolivia, the National Interconnected System (SIN) connects major population centers and represents 83% of the installed capacity. The SIN provides electricity to the largest cities and operates in the Departments of , , , and . Its grid extends over 1,200 miles and covers the central and southern parts of the country. The population in the northern and western parts of the country remains largely unconnected to the national grid.

• Radio broadcast stations: AM 171, FM 73, shortwave 77 (1999). • Television broadcast stations: 48 (1997). • Bolivia has a large number of radio and TV stations broadcasting with private media outlets dominating. There has been a recent, rapid growth of state-owned media, including a network of community radios. State-owned and private radio and TV stations generally operate freely, although both pro-government and anti-government groups have attacked media outlet. • Radio broadcast stations: AM 171, FM 73, shortwave 77 (1999). • Television broadcast stations: 48 (1997). • Bolivia has a large number of radio and TV stations broadcasting with private media outlets dominating. There has been a recent, rapid growth of state-owned media, including a network of community radios. State-owned and private radio and TV stations generally operate freely, although both pro-government and anti-government groups have attacked media outlets.

What is the telecommunications system in Bolivia?

Telecommunications in Bolivia includes radio, television, fixed and mobile telephones, and the Internet. Radio broadcast stations: AM 171, FM 73, shortwave 77 (1999). Television broadcast stations: 48 (1997). Bolivia has a large number of radio and TV stations broadcasting with private media outlets dominating.

Who controls the transmission network in Bolivia?

(*) 53% of the transmission network is operated by ISA Bolivia, a subsidiary of ISA Colombia, which is controlled by the Colombian government. The Viceministry of Land Planning and Environment, within the Planning and Development Ministry, holds the environmental responsibilities in Bolivia.

What is the National Interconnected System (SIN) in Bolivia?

In Bolivia, the National Interconnected System (SIN) connects major population centers and represents 83% of the installed capacity. The SIN provides electricity to the largest cities and operates in the Departments of Cochabamba, Santa Cruz, Oruro, Potosí and Chuquisaca.

What happened to the Bolivian national telecommunications company?

The Bolivian National Telecommunications Company was privatized in 1995 but re-nationalized in 2007; the primary trunk system is being expanded and employs digital microwave radio relay; some areas are served by fiber-optic cable; system operations, reliability, and coverage have steadily improved.

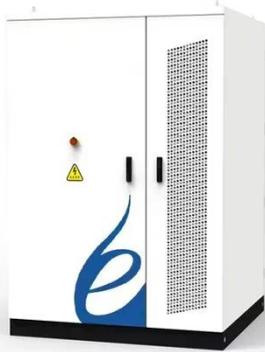

How many transmission companies are there in Bolivia?

Currently, there are three transmission companies which operate the high-voltage Interconnecting Trunk System (STI), the backbone of the SIN. ENDE Corporation, ISA Bolivia, which was created in 2005, and San Cristobal TESA.

Did Bolivia have a power grid?

During that time, Bolivia had one of the longest power transmission grids in South America with a length of several hundred kilometers, though it is unknown if these power schemes were connected before creation of the national grid in 1965. Electrification supplied larger cities and the mining sector, while rural area were mostly neglected.

Bolivian communication base station power

5G Energy Efficiency Overview

The new strategies should not only focus on wireless base stations, which consumes most of the power, but it should also take into consideration the other power consumption elements for ...
