

SolarMax Energy Systems

Buy a 120W solar all-in-one machine

Overview

Which solar inverter should I buy?

For smaller scale systems, we highly recommend the Sol-ark 8k. Contact us for help figuring out which inverter is right for you! When stacked up against similar systems, the Sol-Ark 12k Outdoor Case is not only the most affordable but also the most efficient and innovative solar inverter on the market!.

What is a Sol-Ark 12K solar inverter?

The Sol-Ark 12k is an all-in-one pre-wired solar inverter with systems gains capabilities and true three phase. It is the most efficient and cost-effective inverter in its class by a long stretch.

How many Watts Does a solar inverter need?

Because the idle consumption is high on these all-in-ones, you will need at least 400 watts of solar panels attached to your system to offset the loss. If you do not plan to have your inverter on 24/7, this is not a problem. Some models have a lower solar panel array input voltage (usually 60-148VDC).

What is a Sol-Ark solar inverter?

Sol-Ark inverters also do not have expensive battery restrictions like other solar inverters do, and can be used with a wide variety of 48V battery chemistries, from lead to lithium. Proven to last well beyond the standard 10 year warranty Talk to a US Based Engineer 7 days a week Fastest transfer time in the industry.

Are DIY solar panels UL certified?

Connect some batteries and solar panels, change the settings, and you are done. The DIY battery community has used these units 24/7 for years! They are extremely dependable. As of 2021, they are now UL certified! This means that the components inside the units are high quality.

Do I need a combiner box for a solar array?

If you plan to connect a large solar array, you will probably need to put your panels in parallel to keep the voltage down. When you have more than 2 strings of panels in parallel, you need over current protection for each string. This is easily accomplished by using a combiner box. They are available below.
