

## SolarMax Energy Systems

# Cambodia portable energy storage product production

## Overview

---

Why is Bess a good investment for Cambodia?

BESS can provide much needed grid stabilisation, reliability, decarbonisation while also reducing imported power. As battery storage demand and investment continues to grows, Cambodia is well-positioned to build a reliable, low cost, sustainable energy system for the future.

Why is Cambodia's energy sector a success story?

Cambodia's energy sector has been a tremendous success story over the last 20 years. From experiencing frequent power cuts and limited regional electricity access in 2004 to a stable grid in the capital, Phnom Penh, and a village electrification rate of over 98%.

What is the primary energy supply in Cambodia?

1. 5. The total primary energy supply in Cambodia was about 4.8 million tons of oil equivalent in 2015.8 Fuel wood and other biomass accounted for an estimated 44.4% of the total, oil and petroleum products for 38.5%, coal for 10.7%, hydropower for 3.6%, and electricity imports for 2.8%.

How much money does Cambodia need to build a power plant?

The Cambodian government has stated in its PDP that it will need \$9 billion of investment to develop new power plants and expand the national grid, of which \$2.5 billion has been approved between 2022 and 2025. Opportunities exist for power generation and transmission equipment.

What is Cambodia's power development master plan 2022-2040?

In its Power Development Master Plan (PDP) 2022-2040, Cambodia announced that there would no more investment of coal power plants after 2024, and renewable energy (domestic and imported) would play a significant role towards Cambodia's transition to clean energy.

Can solar energy be used intermittently in Cambodia?

However, the intermittent nature of solar energy benefits from robust storage solutions to store excess generation and provide power during low solar output periods, like the dry season. The Cambodian Minister of Mines and Energy, Keo Rattanak, is targeting 70% renewable energy by 2030.
