Can inverters use gel batteries

Overview

Can I put a gel battery in the inverter?

Can I put the gel battery in the inverter: This battery is 12 Volt and has a 100 amp/hours capacity. Both are lead acid batteries. These batteries aren't designed to be discharged so frequently and to low states of charge with our load shedding. What is more suitable is a compatible/drop in Lithium Ion battery, which is significantly more expensive.

What type of battery should I use for my inverter?

We recommend using a deep cycle battery, such as an RV battery or Marine battery, for your inverter. If you are using a 600 watt inverter or larger, Marine batteries are preferable because they can withstand being deeply drained and recharged many times.

Does Growatt accept gel batteries?

Okay, a lot of problems here, first off I own 4 gel batteries and I would strongly suggest upgrading to lithium batteries as they are much better in every way. I'm pretty sure that Growatt will accept gel batteries with no problem but you can always email them to be sure. The biggest issue here is your VOC.

Can inverters use gel batteries

Gel Battery vs. Lead Acid: The Differences Explained

This article explains everything you need to know about gel batteries vs. lead-acid batteries. There's much confusion about these two ...
