

## SolarMax Energy Systems

# Central African Republic pack lithium battery

## Overview

---

How much money do African countries need to produce lithium batteries?

The required capital expenditure ranges from USD 0.5-1.5 billion. African countries could refine materials for lithium battery production and export to the US and EU. Refining could be in countries that are currently mining raw materials required for battery cell production or have a plan to start by 2030. These include: 4.

Could African countries refine materials for lithium battery production & export?

African countries could refine materials for lithium battery production and export to the US and EU. Refining could be in countries that are currently mining raw materials required for battery cell production or have a plan to start by 2030. These include: 4. Presence of local battery demand or assembly 5. Presence of required talent 6.

What are some examples of a global demand for lithium-ion batteries?

Batteries are one example of this trend. The worldwide demand for lithium-ion batteries (LIBs) is expected to reach 13.5 million metric tonnes by 2030, implying a large increase in the demand for African CRMs including lithium, cobalt, manganese, graphite and phosphate.
