Central Europe rooftop solar photovoltaic panels

Overview

Will the EU rooftop solar standard drive more rooftop solar capacity?

According to our analysis, the EU Rooftop Solar Standard within the EPBD could drive the installation of 150 to 200 GW of additional rooftop solar capacity in the EU between 2026 and 2030. · Critically, the Solar Rooftop Standard will unlock the potential of large rooftops such as those installed on offices, commercial buildings, or car parks.

How big is rooftop solar in Europe?

Total rooftop solar capacity in Europe stood at more than 170 GW at the end of 2023 and is expected to grow to 355 GW by the end of 2027. In addition to the obligatory solar installations under the Solar Standard, the growth of rooftop solar on homes is also likely to increase, as citizens seek to shield themselves from fossil price volatility.

Will the EU solar rooftop standard unlock the potential of large rooftops?

Critically, the EU Solar Rooftop Standard will unlock the potential of large rooftops. The Energy Performance of Buildings Directive (EPBD) officially entered into force.

Are EU member states facilitating rooftop solar deployment?

The report examines EU Member States (Bulgaria, France, Germany, Greece, Italy, Latvia, Lithuania, Portugal, Romania, Spain and Sweden) on their good and bad practices when it comes to facilitating rooftop solar deployment in the EU.

How will the EU solar rooftop standard affect public buildings?

Public buildings like schools and hospitals will be particularly empowered by the EU Solar Rooftop Standard, which ensures they will benefit from solar-reduced energy expenses and dependence on fossil fuels.

What is the solar energy landscape in Europe?

The solar energy landscape in Europe has rapidly evolved, positioning the continent as a significant player in global renewable energy production. As of 2023, the European Union (EU) boasts a total installed solar capacity of approximately 263 gigawatts (GW), making it the second-highest region in the world for solar power capacity.
