

SolarMax Energy Systems

Chad Solar System Design

APPLICATION SCENARIOS

Overview

Does a solar photovoltaic mini-grid work in Chad?

Conclusion In this study, the development of a solar photovoltaic (PV) mini-grid system and a techno-economic assessment of the energy needs of five typical villages in Chad is carried out through both an analytical technique and a field survey.

Does Chad have a hybrid energy system?

In this study, the hybrid energy systems are proposed for all the regions that are not yet electrified in Chad. The National Electricity Company (NEC) of Chad produces and distributes the electricity only in 7 of the 23 regions of Chad; meaning that 16 are un-electrified.

Can solar/wind/diesel/batteries provide electricity in 25 sites of Chad?

assessed the Grid/PV/Wind hybrid energy system viability to provide electricity in 25 sites of Chad . designed a solar/wind/diesel/batteries for three climatic zones of Chad . investigated the feasibility of solar/wind/diesel/batteries for the supply of energy needs of Amjarass (a town in Chad).

Why is electricity important in Chad?

Access to reliable energy is fundamental for the development of any community. The electricity is produced in Chad solely from thermal plants that use fossil fuels, which are not environmentally friendly. In addition, the electrification rate of Chad is less than 11%.

Does solar energy hold promise for rural electrification in Chad?

Solar energy holds promise for rural electrification in Chad. The country has significant potential because the solar radiation is around 6 kWh/m² /day. The sensitivity analysis of the LCOE in relation to the discount rate and asks it for the investment has shown that the cost is very sensitive to the investment premium.

How can Chad solve the energy crisis?

For the Chadian government to solve the energy crisis, it can attract investors by exploring such type of feasibility study of options to electrify the isolated areas. The renewable energy implementation with hybrid system design can significantly reduce greenhouse gas emissions and increase electricity access rate in Chad.
