Change of investment entity energy storage project

Overview

Who can install energy-generation & storage property?

Tax-exempt and governmental entities, such as state and local governments, Tribes, religious organizations, and non-profits may install energy-generation and storage property to meet energy demands, reach clean energy transition goals, or save money on energy costs.

What are the tax benefits of investing in energy projects?

Investments in energy projects offer two primary tax benefits: the ITC and accelerated depreciation. Some developers cannot use these tax benefits themselves but can use them to incentivize tax equity investors that provide bridge financing until the projects receive cash payments.

What is the base tax credit for energy projects?

- For projects beginning construction on or after Jan. 29, 2023 or where the maximum net output is 1 MW or greater, the base tax credit is 6% of the taxpayer's basis in the energy property or qualified facility (or energy storage technology).

What are the major energy-related changes in the Energy Act?

Some of the other significant energy-related changes in the Act include: Denial of the PTC or ITC with respect to solar or small wind energy property that qualified for the residential clean energy credit under Section 25D of the Internal Revenue Code and is subject to a lease arrangement.

Are storage projects eligible for ITC & PTC?

Storage projects that start construction before 2033 will remain eligible for both the ITC and PTC. Those beginning in 2025 can receive an ITC of up to 50% under 48E if domestic content and labor standards are met, though the ITC will phase out entirely by 2035.

How does the inflation Reduction Act affect energy investment?

The Inflation Reduction Act also established the technology - neutral zero greenhouse gas (GHG) emission electricity investment credit under Sec. 48E, which replaces Sec. 48 as the primary tax incentive for investment in clean - energy facilities placed in service after 2024.
