Charging method of a lithium battery pack

Overview

Lithium charge requires a two-stage process involving constant current followed by constant voltage phases. The charging process varies depending on battery chemistry, with lithium iron phosphate batteries requiring different voltage parameters than lithium cobalt batteries.

How to Charge a Lithium Battery Pack?

LiFePO₄ Battery, safety

Wide temperature: -20~55°C

Modular design, easy to expand

The heating function is optional

Intelligent BMS

Cycle Life: > 6000

Warranty: 10 years

Charging a lithium battery pack properly is crucial for maintaining its performance and longevity. Here's a step-by-step guide on how to do it safely and effectively:
