

SolarMax Energy Systems

Chilean lithium iron phosphate portable energy storage company

Overview

Does Chile have a lithium industry?

Chile's government announced plans to take state control over its lithium industry earlier this year. It's currently negotiating state control over SQM, which has a lithium contract that expires in 2030. In 2019 three companies selected for value-added lithium projects in Chile dropped out of planned investments.

How many jobs will a lithium plant create in Chile?

The plant in northern Chile is expected to be operational in May 2025 and will create 668 jobs when it reaches full capacity, the government of Chile, home to the world's biggest lithium reserves, said in a statement.

Is boric negotiating a lithium deal in Chile?

It's currently negotiating state control over SQM, which has a lithium contract that expires in 2030. In 2019 three companies selected for value-added lithium projects in Chile dropped out of planned investments. Boric is on his first visit to China since being elected in 2021.

Where does lithium come from?

And much of that lithium lies in Chile. Already accounting for over 26 percent of current production, a study published in early 2023 by the U.S. Geological Survey states that Chile's borders contain over 36 percent of the globe's economically recoverable lithium reserves.
