

SolarMax Energy Systems

China-Europe New Energy Storage Enterprise

Overview

Does China have a new energy storage system?

Xu Ziming, Director of the Energy Efficiency and Energy Storage Division, Energy Conservation and Technological Equipment Department, National Energy Administration, pointed out in his speech that since the “14th Five-Year Plan,” new energy storage in China has experienced rapid development.

How big is China's energy storage capacity?

Sign up [here](#). Current installed new energy storage capacity, which is made up mostly of lithium-ion battery storage, was 95 GW as of June, the regulator, the National Energy Administration, said in August. China has raced ahead of its energy storage targets in the past.

What are the leading energy storage battery companies in China?

Leading energy storage battery companies in China include BYD (002594.SZ), which is also the country's biggest electric vehicle maker, and CATL (300750.SZ).

What is new energy storage?

New energy storage refers to electricity storage processes that use electrochemical, compressed air, flywheel and supercapacitor systems, but not pumped hydro, which uses water stored behind dams to generate electricity when needed. Our Standards: The Thomson Reuters Trust Principles.

How much will China's ESG plan stimulate investment?

The plan, released by the state planner, National Development and Reform Commission, and the energy regulator, said the target will stimulate 250 billion yuan (\$35 billion) in investment in the sector. Make sense of the latest ESG trends affecting companies and governments with the Reuters Sustainable Switch newsletter. Sign up [here](#).
