

SolarMax Energy Systems

China s communication base stations power 1 2MWh

Overview

How many 5G base stations are built in China?

As 5G serves as the foundation for the construction of new infrastructure, China, as the world leader in 5G base station construction, has already built over 1.4 million 5G base stations in 2021 alone. In the same year, 5G base stations in China produced approximately 49.2 million tons of CO₂ eq.

What will China's base stations be like in 2021?

The construction of base stations in China has continued to grow rapidly since 2019. From 2021 to 2030, cumulative carbon emissions during the operational phase will be 710 ± 50 MtCO₂ e, and cumulative carbon emissions during the manufacturing phase will be 102 ± 5 MtCO₂ e, accounting for 87% and 13%, respectively.

How much power does a micro base station use?

The power consumption of a single macro base station is approximately 5 kW, whereas a Pico Cell requires only about 10 W (Bolla et al., 2012; Deruyck et al., 2014; Hu & Yi, 2014). Deploying multiple micro base stations to cover the blind spots of a macro base station will reduce power consumption during operation, thereby reducing carbon emissions.

How much carbon does a micro/macro base station emit?

The results indicated that the carbon emissions of one micro/macro base station were 6.2 ± 0.4 and 30.2 ± 1.5 tons, respectively, subject to one-year operation time. At national level, the total carbon emissions were 17 ± 5 million metric tons (Mt) in 2020, and may increase to 145 ± 7 Mt by 2030.

What equipment does a micro base station use?

The AAU of the micro base station adopts the Remote Radio Unit (RRU) and antennas (Simic, 2007). Equipment parameters vary by manufacturers (Yu et al., 2021). Data from four manufacturers (see Table S2) were collected to

measure their uncertainty through Monte Carlo simulation.

What is the main mode of transport of base station equipment?

The road transportation mode is the main mode of transporting the base station equipment. The main energy consumption is related to fuel usage.
