

## SolarMax Energy Systems

# City Distributed Power Station Energy Storage Project

## Overview

---

Project Drawdown's Distributed Energy Storage solution involves the use of decentralized energy storage systems. There are two basic.

This solution is key for integrating variable renewable generation sources in the electricity grid. To avoid double counting, we account for the emissions impact of distributed energy storage in the variable renewable electricity generation solutions such as Micro Wind.

Distributed energy storage is likely to become more common in the coming years and financially beneficial to consumers in the long term. It should play an important role in.

## City Distributed Power Station Energy Storage Project

---

### A Step Toward Zero Emissions with Virtual Power Plant

Led by Xcel Energy and funded by up to \$12.7 million from the U.S. Department of Energy, this project will help Boulder build an electric grid that fully utilizes rooftop solar, ...
