

## SolarMax Energy Systems

# Communication BESS Power Station Franchise Agent

## Overview

---

What is a Bess system?

At the heart of WEG's BESS solution is an advanced energy control and management solution. This sophisticated system coordinates different operation modes, optimizing the overall performance of the energy storage production.

How many homes can a Bess power system provide?

A medium to large utility-scale BESS can provide energy to over 100,000 homes! BESS are installed in a fenced-in, separate area, near a substation or power transmission line, in either 20' or 40' shipping containers that are easily removable at end-of-life. During low-demand periods, excess energy is stored in advanced battery systems.

Who is Bess partnering with?

We are now focused on developing utility-scale Battery Energy Storage Systems (BESS) in the United States and Spain. Along our journey, we have partnered with prominent companies such as Engie, Grenergy, X-Elio, and BL Harbert International.

How much power does a Bess have?

The system is built of two main blocks. The PCS building block, responsible for the main control of the mobile BESS. The nominal power rating of the PCS block is 225 kVA, with a maximum peak power in the peak shaving mode of 275 kW . The second block is the modular battery pack.

Why should you choose a Bess energy storage system?

The mobility and flexibility of the system enables novel applications and deployments where BESS previously were unused due to the non-flexible solutions. The system is modular, meaning that the energy storage capacity can be quickly adapted depending on the application case, in contrast to

larger and bulkier solutions.

Does Bess require uninterrupted power?

Some BESS suppliers mandate uninterrupted power to maintain the operation of thermal management systems, ensuring battery temperatures remain within desired limits to minimize degradation. BESS fire safety standards, such as NFPA 855, outline minimum requirements for backup power for fire safety systems.

## Communication BESS Power Station Franchise Agent

---

### Battery Energy Storage Systems , BESS , HMS Networks

HMS solutions enable communication inside Battery Energy Storage Systems and integration into a wide range of applications. And also enables remote access to valuable data insights. ...
