

## SolarMax Energy Systems

# Communication base station inverter backhaul

## Overview

---

What is a backhaul connection?

**Backhaul Connection:** The backhaul connection links the base station to the core network in the mobile communication system. It provides for the interchange of data between the base station and other network components, hence communication with extrinsic systems and processes.

What are fronthaul and backhaul in networking?

Backhaul connects the mobile network to the wired network, while fronthaul describes the network architecture that connects remote base stations to the BBU. More specifically, wireless backhaul is the wireless communication system that gets data from remote locations to the main network.

What is Huawei base station backhaul microwave?

Based on leading wireless, transmission, and datacom technologies, Huawei base station backhaul microwave solution provides fiber-level broadband wireless backhaul capabilities, ultra-low latency, fully modular architecture design, and co-site integration with wireless networks.

What is a wireless backhaul?

More specifically, wireless backhaul is the wireless communication system that gets data from remote locations to the main network. A baseband unit (BBU) is a telecommunications network device used to process baseband signals.

Why do we use satellite for cellular base station backhaul?

Satellite are widely used today for cellular base station backhaul when the distance between the base station equipment and the core of the network is too large for microwave to be economically viable.

Does a backhaul link solve the 'last meter problem'?

This paradigm shift solves the “last meter problem” but a new challenge kicks in: backhaul links are needed to connect the small cell base stations and carry the traffic to the core network or at least to the network gateway.

## Communication base station inverter backhaul

---

### BASE STATION, RELAY STATION AND BACKHAUL CONTROL COMMUNICATION

Description BACKGROUND OF THE INVENTIONField of the InventionThe present invention relates a base station, a relay station, and backhaul control communication methods thereof. ...
