

## SolarMax Energy Systems

# Composition of the Dutch mobile energy storage system

## Overview

---

Do Dutch home battery purchases keep driving battery storage installations?

Dutch home battery purchases keep driving battery storage installations. According to Dutch New Energy Research's Nationaal Smart Storage Trendrapport 24/25, 410 MWh of new battery capacity was installed in the Netherlands in 2023 - 1 MWh is enough to power a couple hundred homes for a day.

How can Bess help with the volatility in the Dutch electricity market?

The volatility in the Dutch electricity market presents a landscape of both opportunities and challenges. By integrating advanced energy storage solutions like BESS, you can capitalize on dynamic market conditions while contributing to grid stability.

What are the laws & regulations on energy storage in the Netherlands?

No specific laws & regulations: In the Netherlands, energy storage is not described in Dutch laws and regulations as a specific item. Standard requirements: It has to meet standard requirements for production and consumption and some specific technologies that are part of the energy storage system must comply with standardisation.

What will Antares do for the Dutch energy system?

As grid congestion continues to challenge the Dutch energy system, Antares will store excess renewable energy, deploying it when demand spikes to stabilize the grid. As the first active large-scale BESS location in the Netherlands directly connected to TenneT, it will play a pivotal role in enhancing grid flexibility.

## Composition of the Dutch mobile energy storage system

### The Green Light for the Biggest BESS in the Netherlands

"By 2030, the Netherlands must roll out at least 9GW of battery energy storage to secure Europe's balanced energy grid." The sophisticated BESS consists of 144 cutting-edge ...
