

SolarMax Energy Systems

Container energy storage cabinet structure

Overview

Take the 1MW/1MWh energy storage container system as an example. The system generally consists of an energy storage battery system, a monitoring system, a battery management unit, a dedicated fire protection system, a dedicated air conditioner, an energy storage converter, and an isolation.

Classified by materials used, energy storage containers can be divided into three types: 1. Aluminum alloy energy storage container:the.

- Battery compartment:The battery compartment mainly includes batteries, battery racks, BMS control cabinets, heptafluoropropane fire extinguishing cabinets, cooling air.

Customers purchasing lithium ion battery storagesystems will intensify their demand for energy and electricity as energy storage systems move to longer durations. Lithium battery.

- Energy storage container has good anti-corrosion, fire-proof, waterproof, dust-proof (wind and sand), shock-proof, anti-ultraviolet, anti-theft.
