

SolarMax Energy Systems

Container outdoor power supply site communication

Overview

What is a container substation?

An intelligent solution for obtaining direct current quickly and economically is provided by container substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality.

Which receptacles are suitable for container ports?

In addition to our classic CEE wall mounted receptacles ranging from 16 to 125 A and SCHUKO® receptacles, we offer our suitable lockable DUOi wall mounted receptacle in 16 and 32 A for container ports. Thanks to the rotatable enclosure base and removable mounting plate, the DUOi is quickly installed, flexibly usable, and easy to maintain.

What types of power supplies can be provided?

A wide range of high voltage, CW DC, pulsed or modulated waveform outputs can be provided. The entire system is made to be entirely weatherproof. Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery.

Can you put electricity in a shipping container?

This guide will take you step-by-step through the process of installing electricity in a shipping container, making sure it's done efficiently, affordably, and safely. Adding electricity to a shipping container has many benefits, making it a useful and adaptable space for different uses.

What is a container plug with PE inverter?

Our container plug with pe inverter is housed in the casing of our standard plug. It is made of high-quality plastic in our trusted MENNEKES quality -

produced in Germany and tested in practice worldwide for years. This provides you with robust and durable plugs that are ideally designed for use in container ports and on ships.

How can a container be transported?

The container can be transported by road, rail or water and crane attachment provisions are fitted for loading and unloading. Siemens Mobility continuously improves its components and takes on trends from other industries to bring linked benefits to the rail infrastructure industry.

Container outdoor power supply site communication

Off-grid container power systems

An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.
