Container power generation control room

Overview

What is a containerized operator control room?

The containerized control room is a fully equipped turnkey solution to accommodate the operator supervising a production plant. The containerized operator control room is complete with all safety equipment and equipment, is ready for use and suitable for installation in both temporary and permanent systems.

What is a shipping container electrical room?

At its core, a shipping container electrical room is essentially a mobile substation. It's designed to house all necessary power equipment like switchgear, transformers, and control panels. These units can be easily transported to any location that needs temporary or permanent power solutions from construction sites to remote oil fields.

How does a power control room work?

Each Power Control Room has a customized assembly due to differing customer requirements. The modern dedicated assignment of the AC or DC drive units enables simultaneous use of all motors, avoiding contactors and switches. The container can be supplied either by the generator or grid container.

Can a generator be supplied by a grid container?

The container can be supplied either by the generator or grid container. The main components such as the generator control, main switchboard, SCR and VFD units, etc. are Bentec's own developments which ensure a perfectly aligned and highly reliable system with no interfaces to 3rd party equipment.

What is a Powell power control room?

Introduced in 1968, Powell's power control rooms still set the benchmark for reliability and performance. Offering seamless integration with all equipment

fully installed and functionally tested prior to shipping to the job site, these turnkey solutions maximize efficiencies and provide the single-source responsibility complex projects require.

What is a Bentec power control room?

rough drilling applications. Bentec is committed to manufacturing safe and reliable systems that provide all the power and control electronics needed to power up all of the electric units on a drilling rig. The Bentec Power Control Room provides a high-quality solution for electric distribution in the drilling business.
