

SolarMax Energy Systems

Container power generation system configuration

Overview

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What are the advantages of containerized diesel generator sets?

Advantages of Open-Frame Generator Sets Containerized diesel generator sets are compact, high-efficiency, and easy-to-transport power supply devices that are widely used in locations requiring emergency backup power or temporary power sources, especially in remote areas with unstable grid power or no access to the grid.

What is a containerized diesel generator?

Containerized diesel generator sets are usually equipped with a daily fuel tank to store diesel, ensuring the unit can operate continuously without external refueling for a certain period. The design of the fuel tank directly impacts the generator's endurance, safety, and ease of maintenance. 1. Fuel Tank Capacity Design.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered —500 kW to 1250 kW— units packaged in 30-foot or 48-foot ISO containers.

How should a containerized diesel generator be arranged?

Typically, special attention is paid to the intake and exhaust ports of the containerized diesel generator set to ensure smooth air flow. The intake should be positioned away from dusty or sand-prone areas, and the exhaust port should be properly arranged to expel hot air effectively while minimizing environmental impact.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.
