

SolarMax Energy Systems

Croatia new energy solar power generation for home use

Overview

How can Croatia benefit from solar energy?

However, to harness this potential effectively, Croatia will need to adopt more ambitious solar energy targets, ensure clear renewable energy investment direction in the power sector, and develop its modern electricity grid. The clean energy transition and development of the solar power sector can contribute to GDP growth and new jobs creation.

Does Croatia have a solar market?

The Renewable Energy Sources of Croatia Association (RES Croatia) says Croatia's solar market is growing year over year. But with residential and industrial rooftops accounting for most new installations, a key focus is enabling utility-scale growth. Croatia installed 397.1 MW of solar in 2024, according to figures from RES Croatia.

Will Croatia reach its energy goal by 2028?

The country is going to reach its 2030 goal of 3.5 GW of renewables, envisaged by the energy strategy, by 2028, Milatić added. Solar is leading the new installations. The state secretary noted that in 2018, when Croatia adopted the first rulebook for the production of energy for self-consumption, there was 55 MW of solar power.

How much solar power does Croatia have?

Solar is leading the new installations. The state secretary noted that in 2018, when Croatia adopted the first rulebook for the production of energy for self-consumption, there was 55 MW of solar power. Croatia has now reached 700 MW, out of which 600 MW is on the roofs of firms and homes, Milatić said.

How many solar projects are there in Croatia?

Among the solar projects announced in Croatia last year were a 99 MW site scheduled for commissioning in 2026 and a 189 MW facility, set to be the

country's biggest plant to date. Croatia held a renewables auction in summer 2024 that awarded more than 400 MW of solar across two categories.

How does Croatia get its electricity?

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krško nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.
