

SolarMax Energy Systems

Cuban household energy storage battery

Overview

What's going on with Cuba's energy crisis?

Havana (EFE).- Cuba has endured 12 months of a full-blown energy crisis marked by blackouts lasting up to 20 hours a day, four nationwide power outages, repeated breakdowns at power plants, a paralyzed economy, and growing social frustration. Experts warn that there is little prospect of improvement in the near future.

How many hours a day does Havana go without electricity?

Many wake up in the early hours of the morning, when electricity briefly returns, to cook, iron, or pump water. While Havana faces cuts ranging from four to 10 hours daily, the rest of the island often experiences more than 20 hours without power, disrupting households, offices, and factories.

Why are power outages a problem in Cuba?

Power outages have become the top concern for Cubans, who struggle to preserve food, conduct banking or bureaucratic tasks, charge electric motorcycles and phones, and carry out household chores. Many wake up in the early hours of the morning, when electricity briefly returns, to cook, iron, or pump water.
