

SolarMax Energy Systems

Current photovoltaic module export market

Overview

Recently, China's General Administration of Customs released the import and export data of photovoltaic modules in May 2024, which showed that the export amount of components continued to decline, but the export volume of components still maintained the growth trend, presenting a trend of "volume increase and price reduction".

Current photovoltaic module export market

Snapshot of Global PV Markets

After several years of tension on material and transport costs, module prices plummeted in a massively over-supplied market, maintaining the competitiveness of PV even as electricity prices ...
