

SolarMax Energy Systems

Customized photovoltaic cell modules

Overview

What is a sunwize OEM solar module?

SunWize OEM Solar Modules are convenient and cost effective ways to increase battery life by maintaining the battery's state-of-charge. SunWize manufactures and integrates custom engineered solar modules into battery operated products, such as GPS trackers, kiosks, military equipment, vehicles, and more!.

Are monolithic solar modules a good choice?

Our cutting edge monolithic construction solar modules are more robust than any others on the market, far surpassing the performance of typical laminate or glass solar modules. No other product can offer a full 10-year warranty! Using an OEM solar module assures your product is optimized for performance and completely reliable.

Are solar panels a sustainable solution for commercial trucking?

Solar power is emerging as a transformative solution, offering a sustainable way to address these challenges across various systems within a truck. This blog overviews five key areas where solar panels make a tangible impact—offering savings, reliability, and efficiency. What's The Return on Investment for a Commercial Trucking Solar Solution?

.

How much power does a monocrystalline solar panel produce?

The more cell area, the more power is produced. For example, this monocrystalline panel on the left has 118 cm² of cell area (12 52mm x 19mm pieces) using 19.1% efficient cells and is rated for 2.3 Watts. The SunPower panel on the right has 129 cm of cell area (18 50mm x 14.4mm pieces) using 23.1% efficient cells and is rated for 3.0 Watts.

How does a string of cells affect a solar panel?

A string of cells generates as much current as the worst performer in the string. When cell pieces are smaller, the shading impact increase. Coating Options We recommend a coating for the panel based on your durability, cost, and design constraints. The four options are: Urethane: Highly UV resistant and durable.

Can I create a custom panel mount?

In addition to customizing the embedded screws or adding through holes, we offer the ability to create a custom panel mount for your specifications. This includes the design and manufacture of custom brackets, gaskets or VHB seals. Our standard wire has strain relief is about 12 inches long and terminates in a 3.5x1.1mm plug.

Customized photovoltaic cell modules

Colorful photovoltaic panels, from red to white modules

What color are the solar panels? Most photovoltaic modules on the market, based on crystalline silicon, appear dark blue or black. Their color depends largely on the crystalline ...
