

## SolarMax Energy Systems

# Cyprus solar power generation and energy storage

## Overview

---

In 2011, the Cypriot target of , including both photovoltaics and , was a combined 7% of electricity by 2020. While Cyprus saw a 16% increase in solar panel installations in a 2021 report, the country still grapples with low renewable energy usage, standing at 13.8%, compared to the EU average of 19.7% in 2019.

In an attempt to make Cyprus more energy self-sufficient, the EU-funded TwinPV initiative focuses on bolstering the country's technological know-how through the sharing of expertise on the entire solar energy cycle – from cells and modules to storage and smart electricity grids.

---

### Solar power in Cyprus

The country aims to increase total renewable energy penetration in the electricity sector to 700-750 MW by 2023, primarily through solar power initiatives. Efforts include promoting electric ...
