

SolarMax Energy Systems

Czech Energy Storage Equipment Project

Overview

How will a storage system help the Czech energy sector?

The storage system will support the transformation of the Czech power sector and contribute to the stabilisation of the power grid by providing power balance services. "Europe's energy sector is changing dynamically, but a secure energy supply and network stability remain the cornerstones.

Will a house-sized battery help stabilize the Czech energy grid?

The House-sized Battery Will Help Stabilise the Czech Energy Grid *The battery storage capacity is 10 MW and it exceeds the current largest battery in the Czech Republic by more than 40%. *The system can hold 9.45 MWh of energy, three times the size of the ČEZ battery in Tušimice.

Why should we decarbonise the Czech energy sector?

"The decarbonisation of the Czech energy sector is an opportunity for green resources combined with smart solutions. This is exactly the connection we see in Vítkovice, where we have already modernised the operation of the power source and this year we will add the largest Czech battery.
