

## SolarMax Energy Systems

# Czech photovoltaic solar energy storage battery

## Overview

---

Will a house-sized battery help stabilize the Czech energy grid?

The House-sized Battery Will Help Stabilise the Czech Energy Grid \*The battery storage capacity is 10 MW and it exceeds the current largest battery in the Czech Republic by more than 40%. \*The system can hold 9.45 MWh of energy, three times the size of the ČEZ battery in Tušimice.

Will a battery storage system help Czech companies achieve net zero?

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits of solar and other renewable energy sources. To do so, battery storage will be essential.

Will ez Esco build the largest battery in the Czech Republic?

CEZ Group Media Press releases ČEZ ESCO Will Build the Largest Battery in the Czech Republic in Vítkovice. The House-sized Battery Will Help Stabilise the Czech Energy Grid 9. 3. 2023 ČEZ ESCO Will Build the Largest Battery in the Czech Republic in Vítkovice. The House-sized Battery Will Help Stabilise the Czech Energy Grid.

Is there a potential for solar installations in Europe?

There is a huge potential for solar installations, with ideal climate conditions and substantial funding coming from the EU. The situation is similar in other areas of Central and Eastern Europe, where Wattstor has already completed a number of successful renewable energy installations – such as Poland, Croatia and Slovakia.
