

SolarMax Energy Systems

Desert lithium battery energy storage system

Overview

What is a battery energy storage project?

This battery energy storage project will help relieve the demand on the electrical grid by storing renewable energy generated from the Desert Sunlight Solar Farm and allow for consistent energy delivery during peak hours when the system may not be generating energy.

Is the desert sunlight battery energy storage system fully operational?

PALM SPRINGS, Calif. — In another step towards achieving a clean energy future and meeting the Biden-Harris administration's goal to achieve 100 percent carbon-free electricity by 2035, the Bureau of Land Management is announcing that the 230-megawatt Desert Sunlight Battery Energy Storage System is now fully operational.

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

Desert lithium battery energy storage system

Desert Peak Battery Energy Storage System, US

The Desert Peak Battery Energy Storage System is a 325,000kW energy storage project located in California, US. The electro-chemical battery energy storage project uses ...
